

ARMOR Telematics Device

Track your equipment activity from anywhere

“ARMOR™ is a patented telematics device that gives you data on daily run times, charge times, charge cycles, maintenance needs and if the machine has experienced an impact”

Features

- Simple design
- Installs on any battery powered machine
- Detailed tracking with web-based dashboard interface
- Dedicated connection to Verizon's data network

Benefits

- Unprecedented visibility - understand when employees and equipment are under-utilized
- Proactive maintenance to reduce the chance that equipment fails at the wrong moment
- Improve maintenance of existing equipment to delay future equipment purchases
- Increase battery life through proactive maintenance ensuring less waste
- Verified productivity improvement, labor savings
- Deliver reliable cleaning results to your customers
