ARMOR
ASSET MANAGEMENT

ASSET CENTRAL

Order parts and service right at the asset.

Point. Click. Routed. Approved. Tracked.

“Didn’t we just order that blade?”

Meet us at ISSA

Las Vegas • Nov. 17–19

Another blade or a service call?

A scrubber is leaving streaks again. The crew requests a squeegee blade from the machine’s record. Before approving it, the supervisor sees a blade was ordered last week. Time to call the service tech?

The request, the decision and the order stay with the asset.

Try it with one of yours.

Send us one site’s asset list as it is. We’ll show you how ordering works with your equipment and vendors.
