THREE LEVELS OF CONTROL

Choose the level of intelligence that fits each asset—and your operation.

1 REGISTERED

Know What You Have

WHAT IT IS
Manual entry or imported inventory.
No hardware required.

EXAMPLES (LOW COST ASSETS)

- Weed Wacker
- Blower
- Drill
- Dolly

WHAT YOU GET

- ✓ System of record
- ✓ Inventory visibility

Start by simply knowing what you have.

2 AWARE

Know Where It Is

WHAT IT IS
Beacon-enabled or app-observed assets for presence detection.

EXAMPLES (HIGH COST ASSETS)

- Motorola Radio
- Vacuums
- Mobile workstations
- Testing EQ

WHAT YOU GET

- ✓ Location awareness (proximity)
- ✓ Loss prevention
- ✓ Operational awareness

Now you know where things are.

3 CONNECTED

Know How It's Used

WHAT IT IS
A4+ connected assets with full telemetry via cellular.
A4+ is the Hub.

EXAMPLES (HIGH VALUE ASSETS)

- Ride-on scrubbers
- Fork trucks
- Vehicles
- Lawn Mowers

WHAT YOU GET

- ✓ Real-time telemetry
- ✓ Runtime & utilization
- ✓ Deep insights & analytics

Now you understand how it's used.

HOW IT WORKS

1. REGISTER
List everything in ARMOR—any asset, any type.

2. ADD AWARENESS
Use Beacons or the app to find and protect what matters.

3. CONNECT CRITICAL
Add A4+ to unlock telemetry and drive maximum value.

4. OPTIMIZE
Leverage data, reduce costs, and continuously improve.

PRICING THAT MAKES SENSE

A4+ CONNECTED ASSETS
Per device + annual SaaS. Includes full telemetry, connectivity and Asset Central (base level).

ASSET CENTRAL EXPANSION
Scales with your unconnected assets. Triggered after threshold (e.g., 100 unconnected assets). Simple, predictable, scalable.
